

## Electronic Health Record (EHR) Update

Cecilia Page, DNP
Chief Information Officer, UK HealthCare

## **EHR Project Vision**

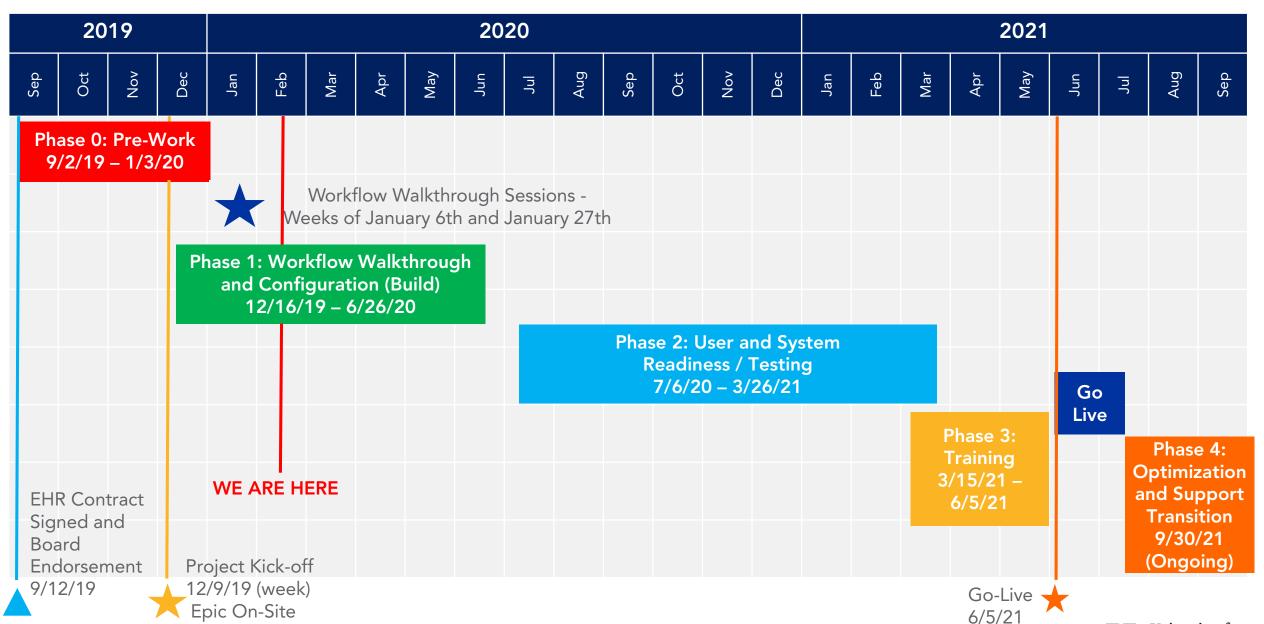

Leverage an enterprise health record as an enabling technology to better the lives and health of the people of Kentucky.

## **EHR Project Mission**

Establish an efficient single-enterprise health record that effortlessly enables our staff and providers to pursue discovery and design for continued delivery of high quality patient centered care to Kentucky.

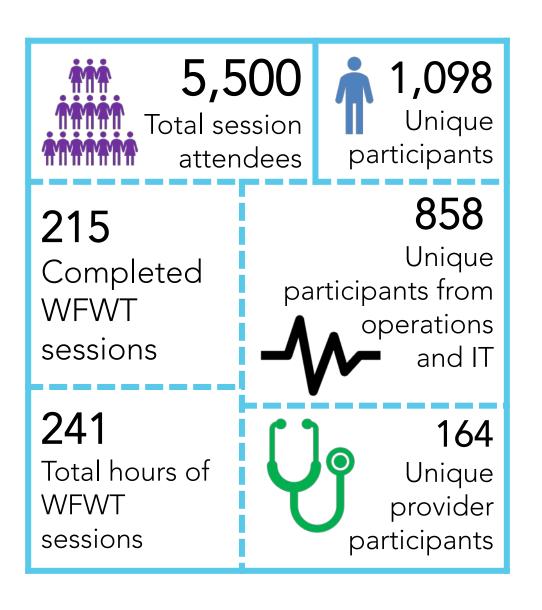

- 1. Patients always will be at the center of design decisions.
- 2. EHR project design will support a complete view of the patient story and seamless communication among clinicians.
- 3. Epic foundation adoption will remain a commitment to standardize system design and care delivery across the enterprise.
- 4. Change decisions will seek consensus that focuses on what is best for improving the patient and caregiver experiences and on creating efficiencies for the enterprise.
- 5. If Epic provides a solution, we will implement and use it to minimize niche systems.
- 6. All decisions will be made through a lens of prudent financial stewardship.
- 7. The Epic implementation is a top priority for the organization; new requests will be evaluated against commitments already made to the EHR.

- Workflow walkthrough (WFWT)
  - Weeks of January 6th and January 27th
- Operational subject matter experts
  - Reviewed workflows in Epic and determined if the workflows met the needs of their department

 Execute change management activities

- Feedback from WFWT sessions
- Decisions from advisory councils and operational work groups
- Changes from operational impact sessions
- Quarterly engagement surveys

7sess Readines Review data gathered

- Assess engagement
- Analyze inputs in change impact matrix

• Epic Foundation Alignment – Ongoing tracking of adherence to Epic Foundation and minimizing system customizations

 Organizational Competing Priorities – Constant collaboration with leadership on organizational priorities and operational time commitments to ensure focus on Epic project activities and work group/advisory council meetings

• Decision-Making Adherence – Maintaining urgency for work groups and advisory councils to make decisions per project schedule to eliminate re-opening decisions
