

# FCR 16

Office of the President  
September 5, 2014

Members, Board of Trustees:

CONSTRUCT/EXPAND/RENOVATE AMBULATORY CARE FACILITY –  
UK HEALTHCARE CAPITAL PROJECT  
(PEDIATRIC HEMATOLOGY/ONCOLOGY - PAVILION H)

Recommendation: that the Board of Trustees approve the initiation of the Construct/Expand/Renovate Ambulatory Care Facility – UK HealthCare Capital Project (Pediatric Hematology/Oncology – Pavilion H).

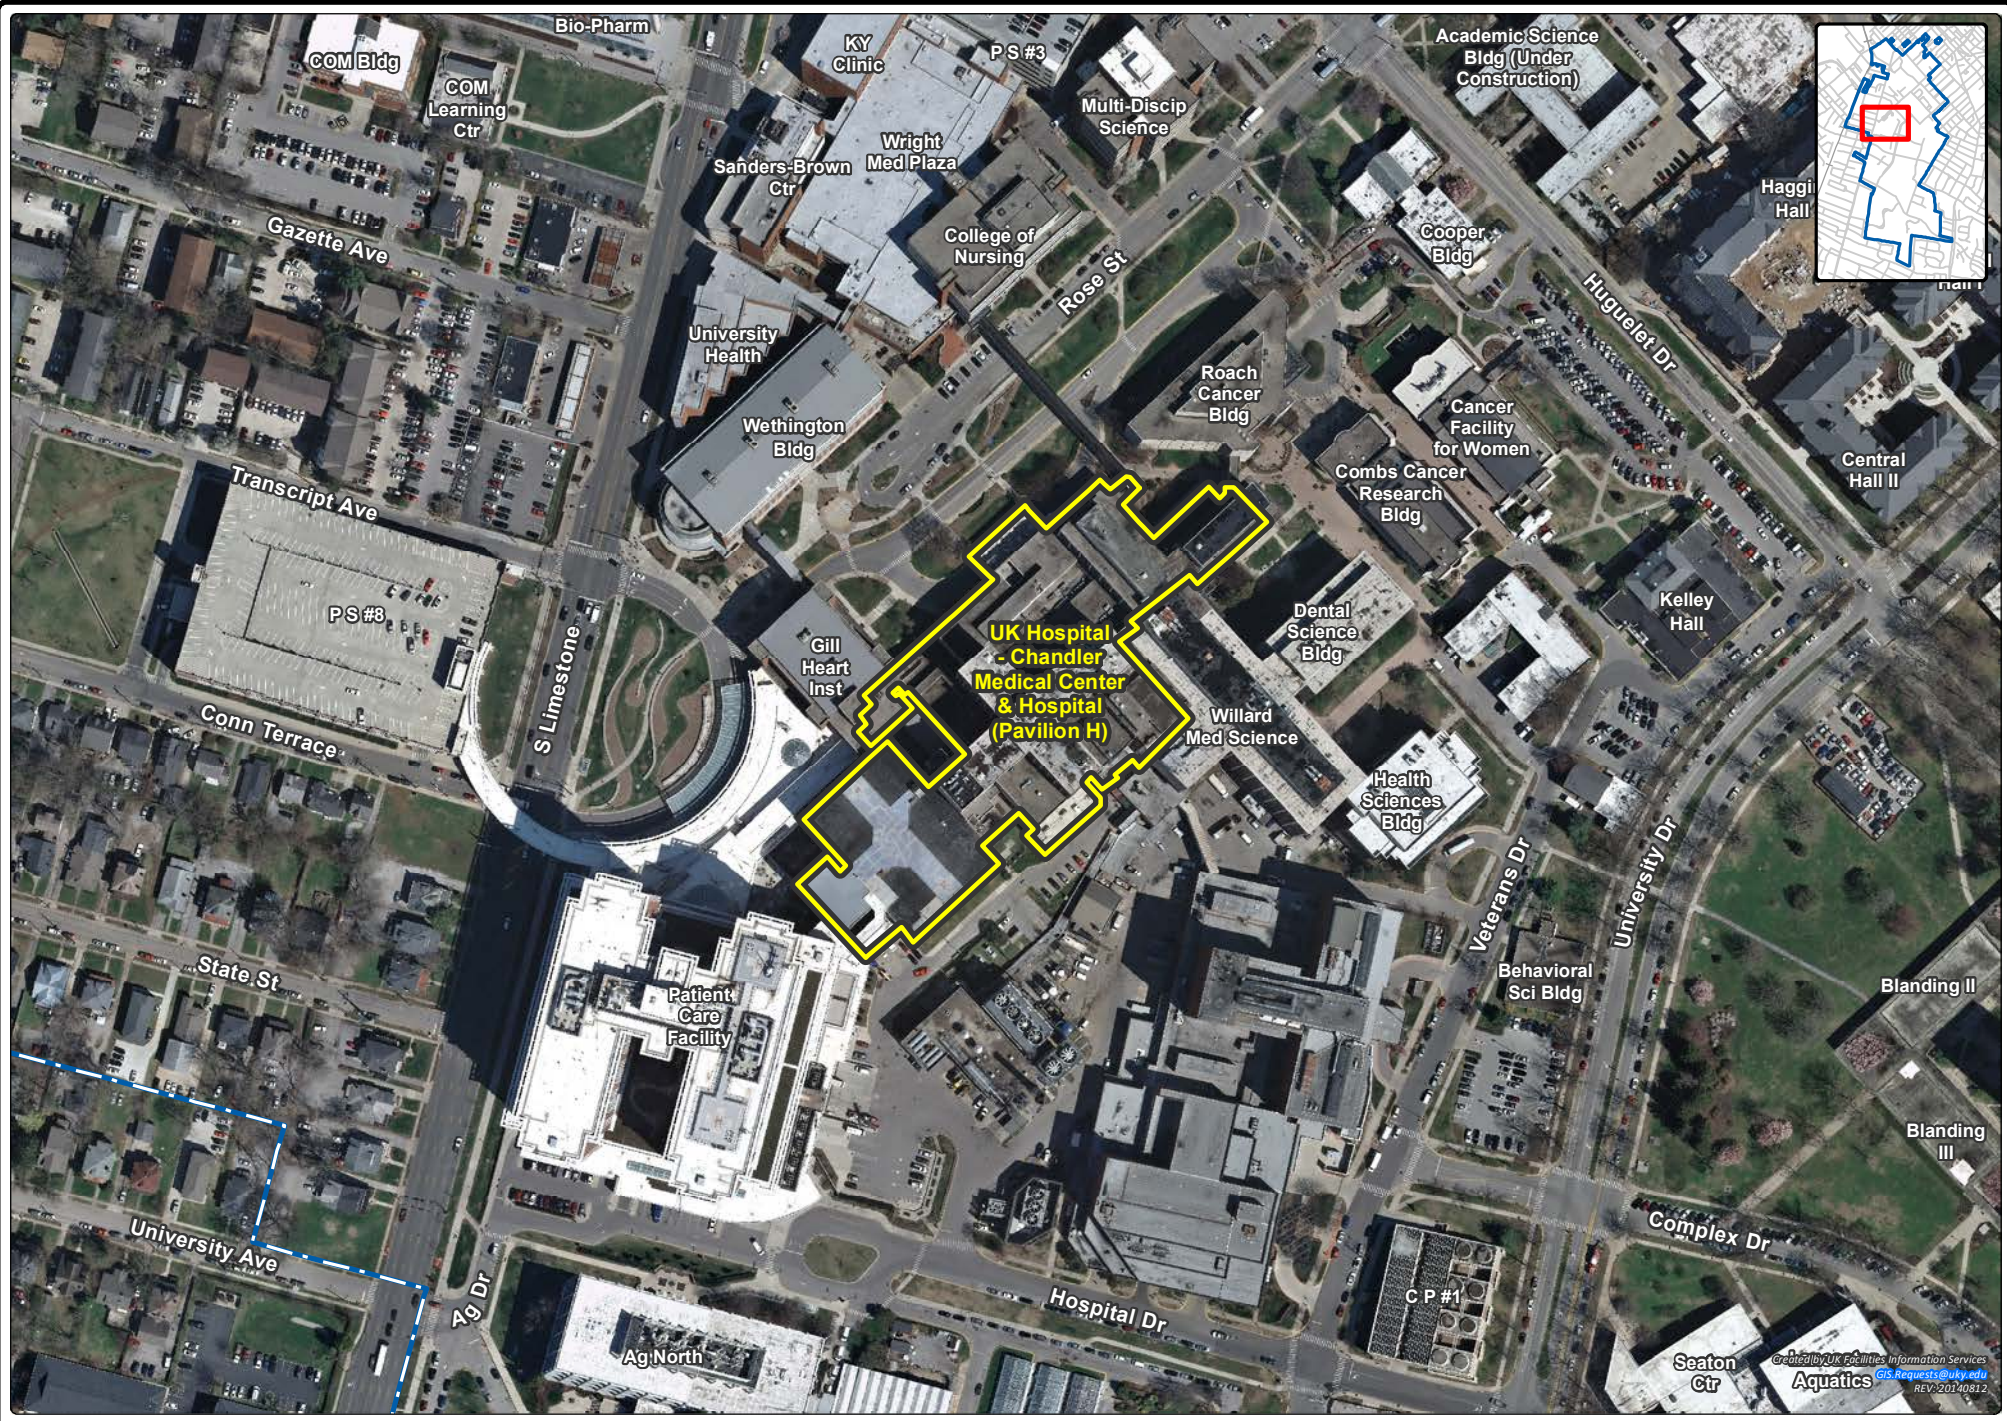

Background: Pediatric Hematology/Oncology services are currently located on the second floor of the Kentucky Clinic. This capital project will renovate space on the fourth floor of Pavilion H to relocate Pediatric Hematology/Oncology services. The renovation will create pediatric exam room space and locate Pediatric Hematology/Oncology services in proximity to other pediatric services also on the fourth floor of Pavilion H. This project will result in enhanced overall coordinated care for children.

The \$1,400,000 project will be funded with agency funds and private funds raised by DanceBlue. Pending Board approval, this project will be reported to the Capital Projects and Bond Oversight Committee for interim legislative authorization.
