Members, Board of Trustees:

UNIVERSITY RESEARCH PROFESSORSHIPS

Background: The University Research Professorships were established by the University of Kentucky Board of Trustees in 1976 to recognize outstanding research achievements by members of its faculty.

The University Strategic Plan includes the principle of Inspiring Ingenuity, which advances a culture of innovation and builds upon the university's signature accomplishments in research to develop solutions that attract prosperity and well-being to Kentucky and its citizens. Consistent with the principles of Inspiring Ingenuity, the University Research Strategic Plan has as a major objective to foster an inclusive culture of research success to retain and develop outstanding faculty.

Toward these principles and objectives, the University Research Professors Program recognizes excellence across the full spectrum of research, scholarship and creative endeavors within each college. Individuals who displayed excellence in research and scholarly activity within their area of expertise, were nominated based on criteria developed by college leadership. The purpose of the University Research Professorship program is to recognize and publicize research accomplishments of these scholars across the full range of disciplines at the University of Kentucky.

Action taken: Approved Disapproved Other _____
